- Victim Crisis Unit (VCU)
- Victim Assistance and Referral Services
- Police Crisis Unit department

Solution to

- Client & Case Management
- Volunteer Management
- Resource Management
- Document & Email
- Reporting
- Team collaboration
- Knowledge Management

Data management solution for Victim Support Services

Efficiency

Spend less time managing the information, more time helping victims. Avoid cumulating data manually and generate your monthly and quarterly reports in seconds

Organization

Keep all your information in one central location. Organize your data around Clients, Cases and Activities. Use search and queries to find your information quickly

Quality of your Service

Be more responsive and up-to-date with your client's cases. Collaborate with your team for maximum knowledge awareness

Client, Case, Activity Management

- Create Client, Case and Activity record easily
- Fill the electronic forms just like you would on paper
- Store these new records on your network to allow your team to access the same info
- Use the dashboards, reports and search to keep track of your clients
- Use the reporting engine to generate your Monthly and Quarterly reports in seconds

Volunteer Management

- Centralize your Volunteers information
- Capture contact info, their resume, training, etc...
- Use the service of our partner VolunteerSpot to schedule your volunteers online

Resource Management

- Keep a centralized collection of all your internal, local and non-local resources
- Resource can be a pamphlet, a book, a service you offer, a local supplier, almost anything you want
- Categorize and group your resources
- Use the built-in search & query to find the right resource
- Generate electronic list for your Volunteers
- Keep track of your resource usage including your own inventory

Reporting

- Use the built-in reporting engine from Microsoft
- Export any report to Excel or PDF
- Use the many included reports from the modules
- Ask us if you need custom reports built

NOVABRAIN
FILE SERVER CONTENT MANAGEMENT

ABOUT NOVABRAIN

Novabrain Technologies Inc. is a leading Content Management software company located in Canada's National Capital region. Founded in 2003, Novabrain leverages the latest technologies in information management to develop innovative solutions to address the issues related to Folder Content Management. Shared folders, mapped drive and file server massive amount of data is Novabrain expertise.

The Victim Assistance Services Edition is based on Novabrain Folder Content Management technologies which allow us to offer a customized solution while maintaining a low price point and minimal system requirements. Two features really appreciated by non-for-profit organizations.

Full Search Engine

- Leverage Novabrain Content Management tools by using the built-in full search engine
- Just like Google, search for keywords in any records and documents
- Will search inside MS Office documents, PDF, emails, etc...
- Use your records to filter your search. Like searching all documents for a specific Client, Case or Volunteer

No Special Hardware Requirement

- No need to purchase additional equipment or licenses to use Novabrain
- If you already have a shared drive or mapped drive where your team can save their documents, you are good to go
- No Database to purchase or maintain

MS Office & Outlook integration

- Open and save document directly to your records (Client, Case, any record)
- Save email you send and receive to your records
- Included document revision tool
- Integrates with Office 2003 and 2007
